Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), (fax (613) 951-2848), Internet: shadsan@stacan.ca or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 62-004-XPB, is published quarterly in a paper version for \$25.00 per issue or \$83.00 for four issues in Canada. Outside Canada the cost is US\$25.00 per issue and US\$83.00 for four issues.

Please send orders to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or by dialling (613) 951-7277 or 1 800 700-1033, by fax (613) 951-1584 or 1 800 889-9734 or by Internet: order@statcan.ca. For change of address, please provide both old and new addresses. Statistics Canada publications may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

Standards of service to the public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section du service à la clientèle, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9606), (télécopieur : (613) 951-2848), Internet : shadsan@stacan.ca ou à l'un des centres de consultation régionaux de Statistique Canada :

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^p preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject of a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^p nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

Highlights

Farm Input Price Index

First Quarter 1997

Western Canadian farmers, particularly those who raise livestock, paid more to do business over the past 12 months than their counterparts in the East.

In the first quarter of 1997, farm input prices for Western Canada rose 2.9% from the same period a year earlier, compared with only a 1.8% increase for Eastern Canada.

For western farmers, the price of virtually all inputs into animal production increased 8.9% over the 12-month period, while in the East, it went up only 2.5%.

For Canada as a whole, farmers paid 2.4% more to do business on a year-over-year basis, despite a 13.2% decline in interest costs.

First quarter figures are the only ones to reflect changes in the farm rent and property tax indexes. At the national level, the index for farm rent declined 1.8%, while the property tax index increased 3.6%.

Higher cattle, poultry prices for Western producers

In the West, farmers faced price increases in seven of nine input categories; in particular, building and fencing materials and animal production.

The increase in the cost of animal production was due to higher prices for feeder cattle (+27.3%), weanling pigs (+12.3%) and poultry (+2.4%).

While higher prices for building materials contributed most to a 6.3% increase in the building and fencing index, western farmers also paid more for machinery and motor vehicles and supplies and services, including heating fuel and electricity.

Farm wages rose 3.4% annually. Higher prices for legume and grass seed and crop insurance resulted in a 1.8% increase in the crop production index.

However, farmers in the West benefited from lower prices for farm rent and lower interest costs, which declined 13.2% as a result of lower rates for non-mortgage loans.

In the East, farmers experienced price increases in eight of nine input categories. They too paid more on an annual basis for feeder cattle, weanling pigs and poultry. But due to lower feed prices, the overall increase in the animal production index was more moderate than in the West.

Faits saillants

Indice des prix des entrées dans l'agriculture

Premier trimestre de 1997

Au cours des 12 derniers mois, les agriculteurs de l'Ouest, en particulier les éleveurs de bétail, ont subi une hausse plus importante de leurs coûts d'exploitation comparativement aux agriculteurs de l'Est.

Au premier trimestre de 1997, les prix des entrées dans l'agriculture dans l'Ouest canadien ont progressé de 2,9% par rapport à la période correspondante de 1996, tandis qu'ils ont augmenté de seulement 1,8% dans l'Est.

Dans l'Ouest, le prix de presque toutes les entrées dans l'élevage d'animaux a augmenté de 8,9% sur une période de 12 mois, alors qu'il ne s'est accru que de 2,5% dans l'Est.

Dans l'ensemble du Canada, les agriculteurs ont connu une hausse de 2,4% de leurs coûts d'exploitation par rapport à l'année précédente, malgré une diminution de 13,2% des coûts d'intérêt.

Les chiffres du premier trimestre sont les seuls qui reflètent des variations des indices des loyers agricoles et des impôts fonciers. À l'échelle nationale, l'indice pour le loyer agricole a reculé de 1,8%, alors que l'indice de l'impôt foncier a avancé de 3,6%.

Hausse des prix des bovins et de la volaille pour les producteurs de l'Ouest

Dans l'Ouest, les agriculteurs se sont vu infliger des augmentations de prix dans sept des neuf catégories d'entrées, notamment pour les matériaux de construction et les clôtures et pour l'élevage d'animaux.

L'augmentation du coût de l'élevage d'animaux est attribuable à une hausse des coûts des bovins d'engraissement (+27,3%), des porcelets sevrés (+12,3%) et de la volaille (+2,4%).

La hausse des prix des matériaux de construction est la principale cause de la progression de 6,3% de l'indice des bâtiments et des clôtures, mais les agriculteurs de l'Ouest se sont aussi vu imposer des prix plus élevés pour les machines agricoles et les véhicules automobiles, les fournitures et les services, y compris le combustible de chauffage et l'électricité.

Les salaires agricoles ont augmenté de 3,4% annuellement. La progression des prix des légumineuses et des graminées et de l'assurance-récolte a entraîné une augmentation de 1,8% de l'indice des cultures agricoles.

Cependant, les agriculteurs de l'Ouest ont profité de la baisse des loyers agricoles et du fléchissement des coûts d'intérêt, qui ont chuté de 13,2% à la faveur d'un recul des coûts des prêts non hypothécaires.

Dans l'Est, les agriculteurs ont fait face à des augmentations de prix dans huit des neuf catégories d'entrées. Ils ont aussi payé davantage, d'une année à l'autre, pour les bovins d'engraissement, les porcelets sevrés et la volaille. Toutefois, à cause de la baisse du coût des aliments pour les animaux, l'augmentation globale de l'indice de l'élevage d'animaux a été moins rapide que dans l'Ouest.

Higher prices for building materials contributed to a 4.3% increase in building and fencing. Farmers in the East also paid more for property taxes, estimated at 4.2%, compared with the same period a year earlier. Eastern farmers also benefited from lower costs for non-mortgage loans, which helped push the annual cost of interest down 13.4%.

Higher prices for animal production inputs contribute most to annual increase

On a national basis, farmers paid more in seven of the nine input categories. Again, higher prices for inputs into animal production (+5.1%) contributed most to the year-over-year increase.

Farmers also faced higher prices for machinery and motor vehicles, due in large part to higher prices for gasoline and diesel fuel. Farmers saw higher prices for building materials, which contributed to a 5.1% increase in building and fencing.

Increased prices for crop insurance and legume and grass seed helped push the crop production index up. Also, farm wages rose 3.4%. Higher prices for heating fuel and custom work contributed to a 3.8% annual increase in supply and services.

On the other hand, farmers continued to pay less for interest (-13.2%), as a result of lower costs for non-mortgage loans.

Higher prices for cattle also pushed up quarterly increase

Nationally, farmers paid 0.9% more to do business in the first three months of 1997 compared with the last quarter of 1996. But western farmers again experienced the highest price increases. Input prices rose 1.3% in the West compared with 0.2% in the East.

Eastern farmers benefited from lower prices for farm wages, building and fencing and for inputs into crop production.

Western farmers, on the other hand, benefited from lower estimated prices for farm rent. However, this was offset by a quarter-over-quarter increase in machinery and motor vehicles, animal production and farm wage costs.

Le niveau plus élevé des prix des matériaux de construction a été un facteur de l'augmentation de 4,3% dans les bâtiments et les clôtures. Les agriculteurs de l'Est ont aussi payé davantage en impôts fonciers (+4,2%) par rapport à la même période de l'année précédente. Les agriculteurs de l'Est ont aussi profité du recul des coûts des prêts non hypothécaires, qui a contribué à faire diminuer de 13,4% le coût des intérêts annuels.

Les hausses de prix des entrées dans l'élevage d'animaux sont le principal facteur de l'augmentation annuelle

À l'échelle nationale, les agriculteurs ont subi une hausse dans sept des neuf catégories d'entrées. La progression des prix des entrées dans l'élevage d'animaux (+5,1%) a été le principal facteur de l'augmentation d'une année à l'autre.

Les agriculteurs se sont aussi vu infliger des prix plus élevés pour les machines agricoles et les véhicules automobiles, surtout à cause de l'avance des prix de l'essence et du carburant diesel. Les agriculteurs ont dû déboursier davantage pour les matériaux de construction, ce qui a entraîné une augmentation de 5,1% pour les bâtiments et les clôtures.

La progression des prix de l'assurance-récolte, des légumineuses et des graminées a entraîné une augmentation de l'indice des cultures agricoles. De plus, les salaires agricoles ont monté de 3,4%. La hausse des prix du combustible de chauffage et du travail sur commande a contribué à une augmentation annuelle de 3,8% des fournitures et des services.

Par ailleurs, les agriculteurs ont continué de profiter d'une baisse des coûts d'intérêt (-13,2%), résultat d'une diminution des coûts des prêts non hypothécaires.

L'avance des prix des bovins a aussi propulsé l'augmentation trimestrielle

À l'échelle nationale, il en a coûté 0,9% de plus aux agriculteurs pour être en activité au cours des trois premiers mois de 1997, par rapport aux trois mois précédents. Toutefois, les agriculteurs de l'Ouest ont encore été touchés par la plus forte augmentation des prix. Les prix des entrées ont augmenté de 1,3% dans l'Ouest, comparativement à 0,2% dans l'Est.

Les agriculteurs de l'Est ont tiré profit du recul des prix des salaires agricoles, des bâtiments et des clôtures et des entrées dans les cultures agricoles.

Par ailleurs, les agriculteurs de l'Ouest ont profité d'une baisse des niveaux estimatifs des loyers agricoles. Cependant, cette baisse a été effacée par les augmentations de prix d'un trimestre à l'autre des machines agricoles et des véhicules automobiles, de l'élevage d'animaux et des salaires agricoles.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

TABLEAU - 2

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

where p_t is the price of an item in the current period, and p_0 , q_0 and $p_0 q_0$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_0 , q_0 et $p_0 q_0$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$I_{t/0} = \sum (p_t / p_o) w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'œuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

THE STATISTICS CANADA EARLY MORNING START-UP SPECIAL

Every morning at 8:30 a.m., Monday to Friday, Internet users can display the day's top socio-economic data simply by selecting **Daily News** on Statistic Canada's Web site at www.statcan.ca. There is no charge for this service.

The Daily is an early-bird review of the latest official data and information released by Statistics Canada. Key economic indicators like employment rates and the Consumer Price Index, in addition to a wide range of business-related information, make **The Daily** the #1 choice for business people who want to keep up-to-date on the country's most important economic developments ... as they happen. It is also the best source for concise briefs on the state of the economy and Canadian society in general.

HERE'S JUST A TASTE OF WHAT YOU'LL FIND AT OUR SITE:

- gross domestic product
- income characteristics
- household information
- population statistics
- motor vehicle sales
- fuel prices
- international trade
- agricultural data
- employment rates
- consumer price indexes
- international transactions in securities
- census data
- investment
- wholesale and retail trade
- national accounts and balance of payments
- shipments
- travel statistics
- construction
- manufacturing
- ... and more

FIND OUT WHY JOURNALISTS ACROSS CANADA ACCESS **THE DAILY EVERY** WORKING DAY

The media has long relied on **The Daily** for the information contained in many of the news reports Canadians read or listen to on a regular basis. Now you, too, can link up to this same information quickly and conveniently. What's more, **The Daily** will keep you tuned to the timing and delivery of major Statistics Canada releases and the arrival of our newest products and services.

So, pull up a chair and visit us at our Web site soon. We want your day to get off to the right start.

POUR PARTIR DU BON PIED : **LE QUOTIDIEN** DE STATISTIQUE CANADA

Dès 8 h 30, du lundi au vendredi, les utilisateurs d'Internet peuvent consulter les principales données socioéconomiques de la journée en accédant aux **Nouvelles du Quotidien** sur le site Web de Statistique Canada à www.statcan.ca. Le service est gratuit.

Le Quotidien permet un survol rapide des plus récentes données et analyses officielles que diffuse Statistique Canada. Des indicateurs économiques clés tels que les taux d'emploi et les indices des prix à la consommation, auxquels s'ajoute l'éventail des données sur l'activité commerciale, font du **Quotidien** le choix idéal pour les gens d'affaires qui souhaitent être informés des faits saillants de l'économie... dès qu'ils surviennent. C'est aussi la source par excellence de résumés succincts sur l'état de l'économie et de la société canadienne en général.

VOICI UN APERÇU DU CONTENU :

- produit intérieur brut
- caractéristiques du revenu
- renseignements sur les ménages
- opérations internationales en valeurs mobilières
- données de recensement
- données sur les investissements
- commerce de gros et de détail
- comptes nationaux et balance des paiements
- livraisons manufacturières
- statistiques des voyages
- construction
- fabrication
- ... et plus

- statistiques sur la population
- ventes de véhicules automobiles
- prix du carburant
- commerce international
- données sur l'agriculture
- taux d'emploi
- indices des prix à la consommation

VOYEZ POURQUOI, PARTOUT AU PAYS, LES JOURNALISTES LISENT **LE QUOTIDIEN** CHAQUE JOUR OUVRABLE

Depuis longtemps, les médias puisent dans **Le Quotidien** l'information qui alimente un bon nombre de reportages que les Canadiens lisent ou entendent régulièrement. Désormais, vous aussi pouvez y accéder rapidement et en temps utile. **Le Quotidien** vous informera de l'heure et de la parution des principaux communiqués de Statistique Canada et de l'arrivée de nos plus récents produits et services.

Pour partir du bon pied, ne tardez pas! Visitez notre site Web :

Canada Year Book 1997

The
indispensable
tool for
putting
your data
in context

The publication you are reading at the moment provides vital information about a specific sector of activity in Canada, one of particular interest to you. But are you fully up to date with trends in other sectors, aware of their impact on your field? *Canada Year Book 1997* and *Canada Year Book 1997 on CD-ROM* place your specialized knowledge in a national context. Clarifying the wider issues affecting the country as a whole, they provide the authoritative background for the application of your unique expertise.

Presenting... ...the book!

- More than 300 tables, charts and graphs presenting the latest socio-economic data
- Detailed index
- Exciting visual presentation of the country through 100 stunning photographs
- 80 fascinating feature articles on distinctive aspects of life in Canada
- Durable hardcover binding

Canada Year Book 1997 (Catalogue No. 11-402-XPE97001) \$54.⁹⁵ in Canada (plus \$4.⁹⁵ shipping/handling and applicable taxes)

...the CD-ROM!

- Windows® and Macintosh™ on the same disc
- Powerful search capacity, index menus, hypertext links
- GBook™ software to exploit *CYB97*'s full potential
- video clips and accompanying audio to enhance the visual experience
- English and French versions on the same disc

Canada Year Book 1997 on CD-ROM (Catalogue No. 11-402-XCB97001) \$74.⁹⁵ in Canada (plus \$4.⁹⁵ shipping/handling and applicable taxes)

In print or on screen, *Canada Year Book 1997* will quickly prove to be an invaluable, much-consulted addition to your library ...at a very reasonable price!

en
contexte

La publication que vous consultez à l'instant vous instruit sur un secteur particulier de l'activité canadienne. Mais êtes-vous bien au fait des tendances qui se dessinent dans d'autres domaines et de leur incidence sur vos activités? Pour mieux comprendre l'ensemble des enjeux canadiens, consultez *L'Annuaire du Canada 1997* et *L'Annuaire du Canada 1997 sur CD-ROM*. Cet outil indispensable vous fournira le contenu d'ordre général qui vous permettra de situer vos connaissances particulières dans un contexte global.

Voici enfin... ...le livre!

- Plus de 300 tableaux, diagrammes et graphiques diffusant les plus récentes données socioéconomiques
 - Reliure rigide durable
 - Index détaillé
 - Plus de 100 photos proposant une captivante randonnée visuelle dans tout le pays
 - 80 articles de fonds et encadrés fascinants sur des aspects distinctifs du Canada
- L'Annuaire du Canada 1997* (n° 11-402-XPE97001 au catalogue) \$4.⁹⁵ \$ au Canada (frais d'envoi et de manutention de 4.⁹⁵ \$ et taxes en sus)

...le CD-ROM!

- Windows® et Macintosh™ sur le même disque
 - Une puissante fonction de recherche, des menus faciles à utiliser, des liens en hypertexte
 - Le logiciel GBook™ pour exploiter à fond *L'Annuaire*
 - 75 vidéoclips mis en valeur par des bandes sonores
 - Les versions française et anglaise comprises sur le même disque
- L'Annuaire du Canada 1997 sur CD-ROM* (n° 11-402-XCB97001 au catalogue) 74.⁹⁵ \$ au Canada (frais d'envoi et de manutention de 4.⁹⁵ \$ et taxes en sus)

Que ce soit sur papier ou à l'écran, *L'Annuaire du Canada 1997* demeure un atout important pour mettre vos données en contexte... à un prix concurrentiel!

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), (fax (613) 951-2848), Internet: shadsan@stacan.ca or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 62-004-XPB, is published quarterly in a paper version for \$25.00 per issue or \$83.00 for four issues in Canada. Outside Canada the cost is US\$25.00 per issue and US\$83.00 for four issues.

Please send orders to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or by dialling (613) 951-7277 or 1 800 700-1033, by fax (613) 951-1584 or 1 800 889-9734 or by Internet: order@statcan.ca. For change of address, please provide both old and new addresses. Statistics Canada publications may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguage et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section du service à la clientèle, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9606), (télécopieur : (613) 951-2848), Internet : shadsan@stacan.ca ou à l'un des centres de consultation régionaux de Statistique Canada :

Normes de service à la clientèle

Statistique Canada s'engage à fournir à ses clients des services rapides, fiables et courtois et dans la langue officielle de leur choix. À cet égard, notre organisme s'est doté de normes de service à la clientèle qui doivent être observées par les employés lorsqu'ils offrent des services à la clientèle. Pour obtenir une copie de ces normes de service, veuillez communiquer avec le centre de consultation régional de Statistique Canada le plus près de chez vous.

62-004-XPB

Note to the users:

The available level of detail of the Farm Input Price Index (FIPI) has been made possible since 1992 largely because of Agriculture and Agri-Food Canada funding of the project. Recent changes in the Agriculture and Agri-Food Canada's program data requirement, however, have reduced the need for a detailed FIPI.

Consequently, Statistics Canada will have to terminate the present index series and substitute them by more aggregated measures as a result of resource scarcity to maintain the present form of the index. This downsizing will affect all aspects of the FIPI: type and number of inputs, provincial coverage and frequency. In addition, the series for average prices of selected farm inputs (as published in Cat.no. 62-012-XPB) will be discontinued.

Users who require the present level of detail of the FIPI and who would be prepared to participate in the funding should contact Mr. François Bordé, Prices Division of Statistics Canada before the end of October 1997 by:

<i>Writing:</i>	<i>Statistics Canada Prices Division Jean Talon Bldg. Ottawa, Ontario K1A 0T6</i>
<i>Telephone:</i>	<i>(613) 951-3370</i>
<i>Fax:</i>	<i>(613) 951-2848</i>

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^p preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^p nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'«American National Standard for Information Sciences» – «Permanence of Paper for Printed Library Materials», ANSI Z39.48 1984.

Highlights

Farm Input Price Index

Second quarter 1997 (preliminary)

Farmers paid only 1.3% more to do business in the second quarter of 1997 compared with the same period last year — the lowest annual increase in almost five years. Farmers in the West paid over 2% more for inputs, while prices remained virtually unchanged in the East. This 1.3% gain was the smallest year-over-year increase since the third quarter of 1992 when there was virtually no overall price change.

Farm input prices for western farmers rose 2.1% on a year-over-year basis in the second quarter, the result of higher prices for feeder cattle. By comparison, prices in the East increased marginally (+0.5%).

Nationally, a 15.9% decline in the cost of interest helped offset significant increases for inputs such as feeder cattle and machinery and motor vehicles.

Feeder cattle prices significantly higher

Prices rose in five of the seven input categories surveyed across the country. A 5.8% increase in prices for inputs into animal production contributed most to the annual increase. Producers paid 39.2% more for feeder cattle and 3.7% more for turkey poults. On the other hand, grain feed prices tumbled 34.1%.

Farmers paid more for machinery and motor vehicles, farm wages, lumber and plywood, and for supplies and services such as heating fuel and custom work. Those increases were offset by the drop in interest costs, mainly as a result of lower costs for non-mortgage loans, and lower prices for potatoes (-12.9%) and phosphoric fertilizers (-7.8%).

Prices higher for Western farmers

For the second consecutive quarter, feeder cattle prices were the biggest contributors to the year-over-year increase for western farmers. While cattle prices jumped 41.7%, Western farmers also paid more for other inputs into animal production such as weanling pigs (+14.3%) and poultry (+2.4%).

Western farmers also paid more for hired farm labour and for building and fencing, due to higher prices for building materials. However, western farmers benefited from lower prices for crop production, as prices for potatoes and phosphoric fertilizers declined. Interest costs fell 15.9% as a result of lower rates for non-mortgage loans.

Faits saillants

Indice des prix des entrées dans l'agriculture

Deuxième trimestre de 1997 (données provisoires)

Au deuxième trimestre de 1997, les dépenses d'exploitation des agriculteurs canadiens ont été, au total, 1,3% plus élevées par rapport à la même période en 1996, ce qui constitue la plus faible augmentation annuelle depuis presque cinq ans. Les agriculteurs de l'Ouest ont payé leurs entrées plus de 2% de plus, alors que les prix sont restés pratiquement inchangés dans l'Est. Il s'agit de la plus petite augmentation d'une année à l'autre depuis le troisième trimestre de 1992, où il n'y a presque pas eu de changement au niveau d'ensemble.

Pour les agriculteurs de l'Ouest, les prix des entrées dans l'agriculture ont augmenté de 2,1% d'une année à l'autre au deuxième trimestre, résultat de la hausse des prix des bovins d'engraissement. Par comparaison, les prix pour les agriculteurs de l'Est ont augmenté d'à peine 0,5%.

À l'échelle nationale, une chute de 15,9% des coûts d'intérêt a contribué à neutraliser de fortes augmentations des prix des entrées, comme les bovins d'engraissement ainsi que les machines agricoles et les véhicules automobiles.

Hausse considérable des prix des bovins d'engraissement

Dans tout le pays, les prix ont augmenté dans cinq des sept catégories d'entrées observées. Une progression de 5,8% des prix des entrées dans l'élevage d'animaux a été le principal facteur de l'augmentation annuelle. Les agriculteurs ont dû déboursier 39,2% de plus pour les bovins d'engraissement et 3,7% de plus pour les dindonneaux. Par contre, les prix des céréales fourragères ont dégringolé de 34,1%.

Les agriculteurs ont payé plus pour les machines agricoles et les véhicules automobiles, les salaires agricoles, le bois de construction et le contreplaqué ainsi que pour les fournitures et les services, comme le combustible de chauffage et les travaux sur commande. Ces augmentations ont été effacées par une diminution des coûts d'intérêt, principalement attribuable à une baisse des coûts des prêts non hypothécaires ainsi que du prix des pommes de terre (-12,9%) et des engrais phosphoriques (-7,8%).

Hausse de prix pour les agriculteurs de l'Ouest

Pour le deuxième trimestre consécutif, les prix des bovins d'engraissement ont été les principaux facteurs de l'augmentation d'une année à l'autre pour les agriculteurs de l'Ouest. Alors que les prix des bovins ont bondi de 41,7%, les agriculteurs de l'Ouest ont aussi payé davantage pour les autres entrées dans l'élevage d'animaux, comme les porcelets sevrés (+14,3%) et la volaille (+2,4%).

Les agriculteurs de l'Ouest ont aussi dû déboursier davantage pour la main-d'œuvre agricole salariée ainsi que pour les bâtiments et les clôtures, à cause du prix plus élevé des matériaux de construction. Cependant, ils ont profité d'une baisse de prix de la culture agricole, étant donné la chute des prix des pommes de terre et des engrais phosphoriques. Les coûts d'intérêt ont diminué de 15,9%, résultat d'une diminution des prêts non hypothécaires.

In the East, farmers paid more for cattle (+36.2%) compared with the second quarter of 1996. However, that was offset by a 6.4% decline in prices for weanling pigs, a 2.3% drop for poultry and a significant 35.1% decline in grain feed prices.

Eastern farmers also paid more for building materials and machinery and motor vehicles and faced marginal increases for hired farm labour and supplies and services. They benefited from lower prices for potatoes and fertilizers, and paid less for interest, as a result of lower costs for non-mortgage loans.

Higher cattle prices drove quarterly increase

Nationally, farm input prices rose 1.8% between the first and second quarters of 1997. Input prices rose 2.2% in the West between the quarters, compared with 1.4% in the East.

Higher prices for feeder cattle (+14.2%) and prepared feed (+5.0%) contributed most to the increase in animal production (+5.9%). Farmers also faced higher prices for potatoes and herbicides, which helped push the crop production index up 3.1%.

Marginal price increases for farm wages and building and fencing were offset by lower prices for machinery and motor vehicles and supplies and services. Farmers continued to benefit from lower interest costs, which fell 3.0% from the first to second quarter.

Dans l'Est, les agriculteurs ont aussi payé plus cher les bovins (+36,2%) par rapport au deuxième trimestre de 1996. Cependant, cette augmentation a été compensée par une diminution de 6,4% du prix des porcelets sevrés, une baisse de 2,3% des prix de la volaille et une importante diminution de 35,1% des prix des céréales fourragères.

Les agriculteurs de l'Est ont aussi payé davantage pour les matériaux de construction, les machines agricoles et les véhicules automobiles et ont subi de légères augmentations du coût de la main-d'oeuvre agricole salariée ainsi que des fournitures et des services. Ils ont profité d'une diminution des prix des pommes de terre et des engrais et ont payé moins en intérêts, résultat d'une diminution des taux d'intérêt des prêts non hypothécaires.

La hausse des prix des bovins a propulsé l'augmentation trimestrielle

À l'échelle nationale, les prix des entrées dans l'agriculture ont augmenté de 1,8% entre le premier et le deuxième trimestre de 1997. Les prix des entrées ont augmenté de 2,2% dans l'Ouest entre ces trimestres, par rapport à 1,4% dans l'Est.

Les prix plus élevés des bovins (+14,2%) et des aliments préparés (+5,0%) ont le plus contribué à l'augmentation dans le secteur de l'élevage d'animaux (+5,9%). Les agriculteurs ont aussi connu une augmentation des prix des pommes de terre et des herbicides, ce qui a contribué à une progression de 3,1% de l'indice des cultures agricoles.

De légères augmentations de prix pour les salaires agricoles et les bâtiments et les clôtures ont été neutralisées par des reculs de prix des machines agricoles et des véhicules automobiles ainsi que des fournitures et des services. Les agriculteurs ont continué de profiter du repli des coûts d'intérêt, qui sont tombés à 3,0% entre le premier et le deuxième trimestre.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) *Certain items.*

(3) Les groupes et sous-groupes de produits sont identifiés par le type de caractères d'imprimerie et par l'espacement. Pour plus d'explications, veuillez voir les appendices I ou II.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period (t) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

where p_t is the price of an item in the current period, and p_0 , q_0 and $p_0 q_0$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_0 , q_0 et $p_0 q_0$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$l_{t/0} = \sum (p_t / p_o)^w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'œuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en œuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

Agriculture Statistics at work for you

Did you know that Statistics Canada's **Agriculture Division** provides many of its clients with **special services** tailor-made to meet their unique data requirements? Agriculture Division has a variety of information sources at its fingertips that can be used to provide you with **the data you need to make important decisions as an agri-business specialist**.

SPECIAL TABULATIONS

Looking for specific agriculture data to help in your day-to-day work? Agriculture Division can provide you with customized tables and reports that give you the data you require. You can pick and choose the variables from one or more of our databases and receive them in a format that **best suits your needs**.

ANALYTICAL STUDIES

Require in-depth analysis of the data that affect your industry or market? Agriculture Division's specialized team of professionals has the hands-on experience in data analysis **you want working for you**.

CUSTOM SURVEYS

Do you need information that no one has but you don't know how to get it? Agriculture Division can conduct a special survey or expand on an existing one **just for you**.

Find out for yourself what many agriculture professionals have known for years — Statistics Canada has the know-how and expertise to get the job done!

Les statistiques agricoles à votre service

Saviez-vous que la **Division de l'agriculture** de Statistique Canada fournit à un grand nombre de ses clients des **services spéciaux** qui sont adaptés à leurs besoins en matière de données? La Division puise à même une vaste gamme de renseignements pour vous fournir **les données qu'il vous faut pour prendre des décisions importantes en tant que spécialiste de l'agroalimentaire**.

TOTALISATIONS SPÉCIALES

Vous cherchez des données précises sur l'agriculture pour vous aider dans votre travail quotidien? La Division de l'agriculture peut vous fournir des tableaux et des rapports personnalisés qui renferment les données requises. Vous pouvez choisir les variables qui vous intéressent à partir de l'une ou plusieurs de nos bases de données et recevoir les totalisations sous la forme **qui répond le mieux à vos besoins**.

ÉTUDES ANALYTIQUES

Vous voulez une analyse approfondie des données qui touchent votre industrie ou votre marché? L'équipe de spécialistes de la Division de l'agriculture possède l'expérience pratique de l'analyse des données **dont vous avez besoin**.

ENQUÊTES PERSONNALISÉES

Vous voulez des renseignements inédits mais vous ne savez pas comment les obtenir? La Division de l'agriculture peut mener une enquête spéciale ou élargir la portée d'une enquête existante, **uniquement pour vous**.

Ne rater pas l'occasion de découvrir ce que bien des professionnels du domaine de l'agriculture savent depuis des années - Statistique Canada

ESAS Agricultural Statistics on CD-ROM

Whether you are interested in detailed statistics on dairy farming in Ontario, off-farm income in Saskatchewan, or poultry production in Québec, the data are all there in one easy-to-use package on the ESAS CD-ROM. ESAS, the Extraction System of Agricultural Statistics, combines software with data on a compact disc to give clients desktop access to a wide array of farm financial and physical statistics.

Whether you need the information by region, farm type or revenue class, ESAS has:

- a complete itemization of operating revenues and expenses;
- sources and levels of off-farm income for operators and farm families;
- assets, liabilities, and capital investment for farms; and
- land use and livestock inventories.

The job of administering and evaluating agricultural programs is a challenging one. ESAS simplifies the research burden of program analysts and government administrators with important data on the financial and physical status of Canadian farms. Trade in your stacks of computer printouts for one easy-to-use CD-ROM.

The ESAS CD-ROM (catalogue no. 21F0001XCB) is \$625 (plus GST/HST and applicable PST) in Canada and US \$625 outside Canada. Annual Updates are available after the initial purchase for only \$295 (plus GST/HST and applicable PST) in Canada and US \$295 outside Canada. A discount is available to all educational institutions.

To learn more about ESAS, call the Agriculture Division of Statistics Canada toll-free at 1-800-465-1991.

To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to 1-800-889-9734 or call toll-free 1-800-267-6677 and use your Visa or MasterCard.

Via Internet: order@statcan.ca

ESAS is the product of a joint venture between Statistics Canada and Agriculture and Agri-Food Canada.

SESA Statistiques agricoles sur CD-ROM

Que votre domaine d'intérêt soit l'élevage laitier en Ontario, les revenus hors ferme en Saskatchewan ou la production de volaille au Québec, toutes les données sont disponibles dans la trousse du CD-ROM SESA. Le SESA, le système d'extraction des statistiques agricoles, combine logiciel avec données sur un disque compact pour donner aux clients l'accès à un large éventail de statistiques agricoles financières et physiques.

Que vous ayez besoin d'information par région, partype d'exploitation agricole ou par catégorie de revenus, le SESA comprend :

- le bilan complet des revenus et des dépenses d'exploitation;
- les sources et le niveau des revenus hors ferme des exploitants agricoles et des familles agricoles;
- l'actif, le passif et les immobilisations;
- les estimations portant sur l'utilisation des terres et les stocks de bétail.

La gestion et l'évaluation des programmes agricoles présentent un défi. Le SESA simplifiera le travail de recherche des analystes des programmes et des gestionnaires des gouvernements en leur fournissant d'importantes données sur la situation financière et matérielle des exploitations agricoles canadiennes. Échangez vos piles d'imprimés d'ordinateur contre un CD-ROM facile à utiliser.

Le CD-ROM du SESA (n° 21F0001XCB au catalogue) coûte 625 \$ (TPS/TVH en sus et TVP s'il y a lieu) au Canada et 625 \$ US à l'extérieur du Canada. Les mises à jour annuelles coûtent seulement 295 \$ (TPS/TVH en sus et TVP s'il y a lieu) au Canada et 295 \$ US à l'extérieur du Canada une fois que vous avez acheté la trousse initiale. Tous les établissements d'enseignement peuvent profiter d'un rabais.

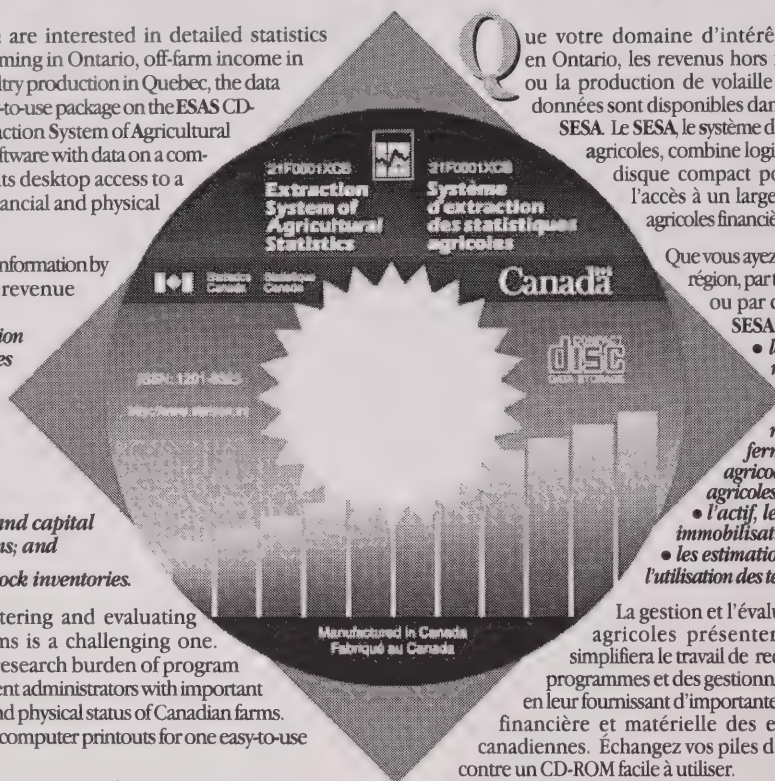

Pour en savoir plus sur le SESA, téléphonez sans frais à la Division de l'agriculture de Statistique Canada au 1-800-465-1991.

Pour commander, écrivez à Statistique Canada, Division des opérations et de l'intégration, Gestion de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre de consultation de Statistique Canada le plus près indiqué dans la présente publication.

Vous pouvez aussi envoyer votre commande par télécopieur au 1-800-889-9734 ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard.

Par l'entremise d'Internet : order@statcan.ca

Le SESA est le fruit d'une collaboration entre Statistique Canada et Agriculture et Agroalimentaire Canada.

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), (fax (613) 951-2848), Internet: shadsan@statcan.ca or to the Statistics Canada Regional Reference Centre in:

Catalogue no. 62-004-XPB, is published quarterly in a paper version for \$25.00 per issue or \$83.00 for four issues in Canada. Outside Canada the cost is US\$25.00 per issue and US\$83.00 for four issues.

Please send orders to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or by dialling (613) 951-7277 or 1 800 700-1033, by fax (613) 951-1584 or 1 800 889-9734 or by Internet: order@statcan.ca. For change of address, please provide both old and new addresses. Statistics Canada publications may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinoilingue et le système d'extraction de Statistique Canada.

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^p preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject of a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^p nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'«American National Standard for Information Sciences» – «Permanence of Paper for Printed Library Materials», ANSI Z39.48 1984.

Highlights

Farm Input Price Index

Third Quarter 1997

Eastern Canadian farmers, particularly those who raise animals, got a break on farm input prices over the past 12 months. In the third quarter of 1997, farm input prices in the East dropped 1.5% compared with the same period a year earlier. By comparison, prices in the West rose 1.5% since the third quarter of 1996, the result of higher prices for feeder cattle (+36.4%). Thus, there was virtually no annual change in the all-Canada total index (+0.1%). This was the first time since the third quarter of 1992 that the index recorded such a small year-over-year change.

The annual decline in the cost of interest (-15.7%) helped offset increases in hired farm labour, machinery and motor vehicles, and building and fencing.

Higher prices for machinery and motor vehicles contributed most to annual increase

On a national basis, farmers paid more in five of the seven input categories. (Property taxes and farm rents are priced only during the first quarter of each year, and are therefore not included in this quarter's input categories.) Higher prices for new machinery (+3.5%) contributed most to the year-over-year increase.

Farmers also faced higher prices for building and fencing due in large part to price increases for building materials. Farmers also paid more for farm labour. Producers paid more for feeder cattle (+34.3%) and artificial insemination (+12.9%). However, this was offset by lower prices for both prepared feed and grain feed compared with the same period a year earlier.

Higher prices for heating fuel helped push the annual index for supplies and services up 1.2%. Conversely, lower prices for fertilizers, particularly phosphoric fertilizers (-7.6%), contributed most to the decrease in crop production. Also, farmers continued to pay less for interest as a result of lower costs for non-mortgage loans.

Prices drop in the East, rise in the West

For the first time since the fourth quarter of 1991, Eastern farmers benefited from a drop in input prices. Farmers in the East paid substantially more for feeder cattle (+31.7%) on a year-over-year basis; however, that was offset by price decreases in broiler chicks, weanling pigs, and egg-producing chicks. Lower prices for prepared feed (-10.8%)

Faits saillants

Indice des prix des entrées dans l'agriculture

Troisième trimestre de 1997

Les agriculteurs de l'Est (en particulier ceux élevant des animaux) ont bénéficié de la baisse des prix des entrées dans l'agriculture au cours des 12 derniers mois. Au troisième trimestre de 1997, les prix des entrées dans l'agriculture de la région de l'Est ont diminué de 1,5% par rapport à la même période de 1996. Les agriculteurs de l'Ouest ont eux vu les prix augmenter de 1,5% depuis le troisième trimestre de 1996, à la suite d'une hausse des prix des bovins d'engraissement (+36,4%). Dans l'ensemble, il y a eu peu de changement annuel dans l'indice total (+0,1%). D'une année à l'autre, il s'agit de la première fois qu'un changement aussi minime est enregistré par l'indice depuis le troisième trimestre de 1992.

La baisse annuelle des coûts d'intérêts (-15,7%) a quant à elle contribué à neutraliser les augmentations des prix de la main-d'oeuvre agricole salariée, des machines agricoles et véhicules automobiles et des bâtiments et clôtures.

Les prix élevés des machines agricoles et des véhicules automobiles contribuent à l'augmentation annuelle

À l'échelle nationale, les agriculteurs ont payé plus cher dans cinq des sept catégories d'entrées observées. (L'impôt foncier et le loyer agricole sont seulement évalués au cours du premier trimestre de chaque année.) Les prix plus élevés des nouvelles machines agricoles (+3,5%) ont le plus contribué à l'augmentation d'une année à l'autre.

Les agriculteurs ont également payé davantage pour la main-d'oeuvre agricole et les bâtiments et clôtures, dans une large mesure à cause des prix plus élevés des matériaux de construction. Les producteurs ont payé plus cher les bovins d'engraissement (+34,3%) et l'insémination artificielle (+12,9%). Cette hausse a toutefois été compensée par une diminution des prix des aliments préparés ainsi que des céréales fourragères par rapport à la même période de 1996.

Les prix plus élevés du combustible de chauffage ont contribué à l'augmentation de 1,2% de l'indice annuel des fournitures et services. La baisse des prix des engrais, particulièrement des engrais phosphoriques (-7,6%), a le plus contribué à la régression de l'indice des cultures agricoles. En outre, les agriculteurs ont continué à payer moins d'intérêts en raison de la baisse des coûts des prêts non hypothécaires.

Baisse des prix dans l'Est et hausse dans l'Ouest

Pour la première fois depuis le quatrième trimestre de 1991, les agriculteurs de l'Est ont profité d'une diminution des prix des entrées. Les agriculteurs de l'Est ont payé sensiblement plus cher pour les bovins d'engraissement (+31,7%) par rapport à la même période de l'année dernière; cette augmentation a cependant été compensée par les baisses des prix des poussins

and grain feed (-36.1%) pushed the annual feed index down 14.6%. Once again, lower costs for non-mortgage loans also helped push down the annual cost of interest.

Compared with the third quarter of 1996, farmers in the East faced price increases for machinery and motor vehicles. Prices were up for supplies and services, due to higher prices for heating fuel, and farmers saw marginal increases in the prices of building materials and farm wages.

In the West, farmers faced price increases in 6 of the 7 input categories surveyed. For the third consecutive quarter, feeder cattle prices were the biggest contributors to the annual increase. Prices for artificial insemination rose 19.3% over the third quarter of 1996. These increases were offset by lower prices for prepared feed (-7.1%) and grain feed (-29.3%).

Western farmers paid more for hired farm labour and for new machinery. Higher prices for building materials (+37.5%) contributed most to the annual index for building and fencing. Western farmers also paid more for supplies and services, including heating fuel and custom work. On the other hand, farmers in the West benefited from lower prices for phosphoric fertilizers (-10.7%) and nitrogen fertilizers (-8.4%) on a year-over-year basis. Lower costs for non-mortgage loans helped push the annual cost of interest down 15.4%.

Marginal price increase on a quarterly basis

Nationally, farmers faced virtually no price changes in order to do business in the third quarter of 1997 compared with the second quarter. Input prices were unchanged in the East compared with a marginal 0.2% increase in the West.

With the exception of hired farm labour, farmers in the East experienced only slight increases in 3 of the 7 input categories.

Western farmers, however, benefited from price drops in 4 of the 7 input categories, but this was offset by quarterly price increases for feeder cattle (+9.1%), which carries more weight in the index in the West than in the East.

à griller, des porcelets sevrés et des poussins à oeufs. La chute des prix des aliments préparés (-10,8%) et des céréales fourragères (-36,1%) ont contribué à la baisse de l'indice annuel des aliments du bétail (-14,6%). La baisse des coûts des prêts non hypothécaires a contribué au repli des coûts d'intérêts pour l'année.

Dans l'Est, les agriculteurs ont payé davantage pour les machines agricoles et les véhicules à moteur par rapport au troisième trimestre de 1996. Les prix des fournitures et services ont augmenté en raison de la hausse des prix du combustible de chauffage. Les agriculteurs ont également subi de légères augmentations de prix en ce qui concerne les matériaux de construction et les salaires agricoles.

Dans l'Ouest, les agriculteurs ont vu les prix augmenter dans six des sept catégories d'entrées observées. Pour le troisième trimestre consécutif, le prix des bovins d'engraissement a constitué le principal facteur de l'augmentation annuelle. Les prix de l'insémination artificielle ont augmenté de 19,3% par rapport au troisième trimestre de 1996. Ces augmentations ont été compensées par une diminution des prix des aliments préparés (-7,1%) et des céréales fourragères (-29,3%).

Les agriculteurs de l'Ouest ont dû déboursier davantage pour la main-d'oeuvre agricole salariée et pour les nouvelles machines agricoles. La hausse des prix des matériaux de construction (+37,5%) a le plus contribué à la hausse de l'indice annuel des bâtiments et clôtures. Les agriculteurs de l'Ouest ont aussi payé davantage pour les fournitures et services, y compris le combustible de chauffage et le travail sur commande. Ceux-ci ont cependant profité d'une diminution des prix des engrais phosphoriques (-10,7%) et des engrais d'azote (-8,4%) par rapport à l'année précédente. Par ailleurs, la baisse des coûts des prêts non hypothécaires a contribué à la diminution de 15,4% des coûts d'intérêts annuels.

Une faible augmentation trimestrielle des prix

Au troisième trimestre de 1997, les dépenses d'exploitation des agriculteurs à l'échelle nationale sont demeurées pratiquement inchangées par rapport au trimestre précédent. Les prix des entrées n'ont pas changé dans l'Est et n'ont augmenté que de 0,2% dans l'Ouest.

Outre la main-d'oeuvre agricole salariée, les agriculteurs de l'Est n'ont connu qu'une légère augmentation des prix dans seulement trois des sept catégories d'entrées.

Dans l'Ouest, les agriculteurs ont toutefois profité d'une diminution des prix dans 4 des 7 catégories d'entrées observées. Cette diminution a été contrebalancée par la hausse des prix des bovins d'engraissement comparativement au trimestre précédent (+9,1%); il en est résulté une plus grande incidence sur l'indice dans l'Ouest que dans l'Est du pays.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) The indexes are subject to two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(2) Selected items.

(3) Groups and sub-groups of commodities are identified by the type of print and by the spacing. For further detail, see appendix I and II.

TABLEAU - 2

Indices de prix des entrées dans l'agriculture (1986=100)⁽¹⁾

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) Certains items.

(3) Les groupes et sous-groupes de produits sont identifiés par le type de caractères d'imprimerie et par l'espacement. Pour plus d'explications, veuillez voir les appendices I ou II.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar farm expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_0}{\sum p_0 q_0} \times 100$$

where p_t is the price of an item in the current period, and p_0 , q_0 and $p_0 q_0$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_0 , q_0 et $p_0 q_0$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$I_{t/0} = \sum (p_t/p_o)^w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'oeuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en oeuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

FIND STRENGTH IN NUMBERS!

Let us show you how to take advantage of the multitude of data available from Canada's leading statistical agency.

Statistics Canada is the first-hand source of information about Canada, its economy, its institutions and its people. We collect and maintain hundreds of databases of reliable information; from patterns in family expenditures to international trade statistics; from details on Canadians' health and educational qualifications to employment and labour trends. We can produce comprehensive profiles of Canada's society and economy using the data from over 400 surveys.

Our **Advisory Services** team of expert consultants is here to help you discover Statistics Canada. We will work with you to define your needs, sift through our vast resources and put together an information package designed to meet those needs. Our highly trained staff:

- can analyze and interpret your customized data packages
 - provide you with ongoing support through our telephone enquiry service
 - offer workshops and seminars on a wide range of topics
- We can even conduct surveys tailored to your specialized requirements.

In today's complex social and economic climates, accurate and up-to-date information is an essential tool for performing such detail-intensive tasks as researching, planning, teaching or analyzing. Rely on the expertise at Statistics Canada to provide you with the information and services you need, quickly, professionally and cost effectively.

Call us today and discover how to get our numbers working for you!

LES CHIFFRES FONT LA FORCE !

Découvrez comment tirer parti de la multitude de données offertes par le chef de file canadien en matière de statistiques.

Statistique Canada est la source directe des données sur le Canada, son économie, ses institutions et sa population. Nous compilons et tenons à jour des centaines de bases de données fiables, à partir des habitudes de dépense des familles aux statistiques sur le commerce international et des détails relatifs à la santé et aux niveaux d'instruction des Canadiens aux tendances de l'emploi et de la main-d'œuvre. Nous sommes en mesure de préparer des portraits descriptifs de la société et l'économie canadiennes à l'aide de données provenant de plus de 400 enquêtes.

L'équipe d'experts-conseils de nos **services consultatifs** est là pour vous aider à mieux connaître Statistique Canada. Nous travaillerons avec vous à définir vos besoins, à passer en revue nos vastes ressources et à rassembler des documents pouvant répondre à ces besoins. Notre personnel hautement qualifié :

- peut analyser et interpréter vos ensembles de données personnalisés
 - vous offre un appui constant grâce à notre service de renseignements téléphonique
 - organise des ateliers et des conférences sur une large gamme de sujets
- Nous pouvons même mener des enquêtes spécifiquement conçues pour répondre à des besoins particuliers.

Dans un contexte social et économique de plus en plus complexe, des

renseignements exacts et à jour sont un outil essentiel pour mener à bien des tâches aussi précises que la recherche, la planification, l'enseignement ou l'analyse. Fiez-vous à l'expertise de Statistique Canada pour obtenir les renseignements et les services dont vous avez besoin de manière rapide, professionnelle et rentable.

Téléphonez-nous dès aujourd'hui et découvrez comment vous pouvez profiter de nos chiffres!

Canada: A Portrait

A Memorable Journey Through Canada

A book to captivate everyone, **Canada: A Portrait** is a compelling record in words and pictures of the excitement and diversity of present-day Canada. This all-new edition of Statistics Canada's proven bestseller features a striking full-colour dustjacket reproduction of *Sweetgrass*, the rich impressionistic painting by Canadian artist Frank Mayrs. Once you open its appealing cover, you will discover that **Canada: A Portrait** not only delights the eye, it stimulates the imagination. Each page is brimming with lively and intriguing facts, bringing to life the personality and charisma of Canada in a clear, easy-to-read and entertaining narrative.

From the important to the whimsical...

Canada: A Portrait presents you with the perfect opportunity to explore Canada at your leisure with just the turn of a page. Investigate the diverse regions of Canada from Mount Logan in the Yukon to the St. John River in New Brunswick. Delve into the heartbeat of Canada's society: Who are we? Where do we live? What do we believe in? See how the economy is evolving and what makes it tick. Learn about the activities enjoyed by today's Canadians, such as opera and hockey and home computers. **Canada: A Portrait** offers a complete examination of this unique country and reflects many interesting perspectives.

The Land, The People, The Society, Arts and Leisure, The Economy and Canada in the World

Six chapters provide a guided tour of both the physical and the human landscape of Canada. Each chapter is enriched with personal insights on "being Canadian," shared with you by such eminent people as Myriam Bédard, Gerhard Herzberg and Joe Schlesinger and is adorned with a gallery of imaginative pictorial images.

Share the **Canada: A Portrait** experience with your family, friends and colleagues

Its charming format, rich design, intriguing content and attractive price make this a keepsake volume, ideal both to give and to receive.

Canada: A Portrait is available for only \$39.95 in Canada (plus GST/HST, applicable PST and shipping and handling), US \$51.95 in the United States and US \$59.95 in other countries. To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. Call toll-free: 1-800-267-6677 and use your Visa and MasterCard or fax your order to 1-800-889-9734.

Un portrait du Canada

Un voyage mémorable à travers le Canada

Un portrait du Canada captivera tout le monde. C'est un recueil irrésistible, en mots et en images, de tout ce qui fait le dynamisme et la diversité du Canada d'aujourd'hui. Cette nouvelle édition de l'indiscutable best-seller de Statistique Canada offre, sur la jaquette, un magnifique paysage impressionniste, intitulé *Sweetgrass*, de l'artiste canadien Frank Mayrs. Dès la première page, vous serez fasciné par la beauté des images et du texte et vous laisserez vagabonder votre imagination. Chaque page regorge de faits vivants et intrigants donnant vie au caractère et au magnétisme du Canada dans une langue claire, simple et prenante.

De l'important au fantaisiste...

Un portrait du Canada vous permet de visiter le pays durant vos moments libres simplement en tournant les pages. Du mont Logan (Yukon) à la rivière Saint-Jean (Nouveau-Brunswick), tâtez le pouls des différentes régions du Canada. Fouillez au cœur même de la société canadienne : Qui sommes-nous? Où vivons-nous? Quelles sont nos croyances? Voyez comment l'économie évolue et pourquoi elle tourne. Découvrez les activités préférées des Canadiens d'aujourd'hui : de l'opéra au hockey jusqu'à l'ordinateur familial. **Un portrait du Canada** offre un examen complet de ce pays unique reflétant des perspectives intéressantes.

Le territoire, La population, La société, Les arts et les loisirs, L'économie et Le Canada dans le monde

Un tour guidé du paysage physique et humain du Canada vous est offert en six chapitres, chacun est parsemé d'œuvres pleines d'imagination et est enrichi d'un message personnel sur le fait «d'être Canadien». Ces messages sont partagés par d'éminents Canadiens tels que Myriam Bédard, Gerhard Herzberg et Joe Schlesinger.

Partagez cette expérience avec votre famille, vos amis et vos collègues

Son format attrayant, son design riche, son contenu intrigant et son prix alléchant font d'**Un portrait du Canada** un cadeau idéal à donner ou à recevoir.

Un portrait du Canada est en vente à seulement 39,95 \$ au Canada (TPS/TVH, TVP et frais de port et de manutention applicables en sus), 51,95 \$ US aux États-Unis et 59,95 \$ US dans les autres pays. Pour commander, écrivez à Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6 ou communiquez avec le Centre de consultation régional de Statistique Canada le plus près (la liste figure dans la présente publication). Ou encore, téléphonez sans frais au 1-800-267-6677 et portez les frais à votre compte VISA ou MasterCard ou télécopiez votre commande au 1-800-889-9734.

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^p preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revisions

The indexes are subject of a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

This publication was prepared under the direction of:

- **Louis Marc Ducharme**, Director, Prices Division
- **François Bordé**, Chief, Goods & Services Producing Industries Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^p nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

Note concernant CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada

Révisions

Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme**, Directeur, Division des prix
- **François Bordé**, Chef, Section des Industries de biens et de services

Le papier utilisé dans la présente publication répond aux exigences minimales de l'«American National Standard for Information Sciences» – «Permanence of Paper for Printed Library Materials», ANSI Z39.48 1984.

Highlights

Farm Input Price Index

Fourth quarter 1997

Higher prices for feeder cattle pushed the total index up 2.2% in the fourth quarter of 1997 compared with the same period a year earlier. This advance was up significantly from the 0.1% annual increase recorded in the third quarter of 1997.

Over the past 12 months, farmers in the West faced larger price increases for feeder cattle (+29.7%) than their eastern counterparts (+24.5%). However, farmers in the West benefited from lower prices for fertilizers (-10.7%). As a result, overall price increases were virtually the same in both regions.

The overall increase in the index occurred despite a 5.8% decline in interest costs, which were the result of lower rates for non-mortgage loans.

Feeder cattle prices kept dogging farmers

On a national basis, the jump in prices for feeder cattle (+27.4%) contributed most to the annual increase. Producers also paid more for turkey poults but profited from lower prices for weanling pigs and prepared feed since the fourth quarter of 1996.

Higher prices for machinery replacement, such as combines and plows, contributed most to a 2.5% annual increase in machinery and motor vehicles. Farmers also faced higher prices for farm labour and paid more for telephone and custom work.

On the other hand, farmers saw the index for non-mortgage interest drop 7.2% compared with the same period a year earlier. Lower prices for nitrogen fertilizers helped push the annual crop production index down 0.7% and farmers also benefited from lower prices for building and fencing as a result of lower prices for building materials.

First quarterly drop since 1996

The drop in input prices between the third and fourth quarters of 1997 was the first decline since the fourth quarter of 1996, when it fell 2.9%.

Faits saillants

Indice des prix des entrées dans l'agriculture

Quatrième trimestre de 1997

La hausse du prix des bovins d'engraissement s'est traduite par une augmentation de l'indice total de 2,2 % au quatrième trimestre de 1997 par rapport à la période correspondante de 1996. Cette progression est nettement supérieure à l'augmentation annuelle de 0,1 % observée au troisième trimestre de 1997.

Les agriculteurs de l'Ouest ont eu à faire face à de plus fortes augmentations du prix des bovins d'engraissement (+29,7 %) que leurs homologues de l'Est (+24,5 %) au cours des 12 derniers mois. Cependant, les agriculteurs de l'Ouest ont pu profiter d'une baisse de prix des engrais (-10,7 %). Par conséquent, les hausses de prix ont été dans l'ensemble à peu près identiques dans les deux régions.

La hausse globale de l'indice est survenue malgré le recul de 5,8 % des coûts d'intérêt, conséquence du repli des taux de prêts non hypothécaires.

Le prix des bovins d'engraissement demeure la bête noire des agriculteurs

À l'échelle nationale, la hausse du prix des bovins d'engraissement (+27,4 %) a constitué le principal facteur de l'augmentation annuelle. Les producteurs ont également payé plus cher les dindonneaux, mais ont profité d'une baisse de prix des porcelets sevrés et des aliments préparés depuis le quatrième trimestre de 1996.

La hausse des prix pour le remplacement des machines (comme les moissonneuses-batteuses et les charrues) a principalement causé l'augmentation annuelle de 2,5 % des machines agricoles et des véhicules automobiles. Les agriculteurs ont également dû composer avec l'augmentation du prix de la main-d'œuvre agricole et ont payé plus cher le téléphone et le travail sur commande.

Les agriculteurs ont toutefois vu l'indice de l'intérêt non hypothécaire fléchir de 7,2 % par rapport à un an plus tôt. La baisse des prix des engrais d'azote a contribué à réduire de 0,7 % l'indice annuel des cultures agricoles. Les agriculteurs ont également profité du recul du prix pour les bâtiments et les clôtures, grâce à la diminution des prix des matériaux de construction.

Première baisse trimestrielle depuis 1996

La chute des prix des entrées entre le troisième et le quatrième trimestre de 1997 (-2,9 %) a constitué le premier repli depuis le quatrième trimestre de 1996.

Lower prices for weanling pigs (-12.7%) and feeder cattle (-4.5%) contributed most to the decrease in animal production compared with the third quarter of 1997. Lower prices for nitrogen fertilizers (-13.6%) and potatoes (-9.2%) helped push the crop production index down.

However, the preliminary interest figures indicate the cost of non-mortgage interest rose on a quarterly basis, which resulted in an increase in the overall cost of interest (+4.4%). Farmers also paid more for machinery and motor vehicles due in large part to higher prices for trucks and non-powered machinery such as cultivators and balers.

Livestock prices up significantly for western producers

Farmers in the West paid significantly more for feeder cattle compared with the same period a year earlier. In fact, they paid more for all inputs into animal production with the exception of weanling pigs and prepared feed. Feeder livestock also carries more weight in Western Canada than in Eastern Canada.

Farm wages rose 3.6% over the past 12 months and higher prices for machinery and trucks contributed to an increase in machinery and motor vehicles on a year-over-year basis.

Farmers in the West faced higher prices for pesticides (+1.7%) but these were offset by lower prices for seed potatoes and fertilizers (-10.7%). Lower costs for non-mortgage loans helped push the annual cost of interest down 5.7%.

Once again, producers in the East paid more for feeder cattle but did not face the increases in other feeder livestock inputs to the same extent as their western counterparts.

While farm wages and machinery and motor vehicles both went up 2.5%, farmers in the East faced higher prices for pesticides (+2.0%) and saw only marginal decreases in fertilizers (-0.4%).

The East also benefited from lower interest costs (-6.2%) as a result of lower rates for non-mortgage loans.

Les baisses de prix des porcelets sevrés (-12,7 %) et des bovins d'engraissement (-4,5 %) ont contribué le plus à la diminution de l'élevage d'animaux par rapport au troisième trimestre de 1997. Les baisses de prix des engrais d'azote (-13,6 %) et des pommes de terre (-9,2 %) ont contribué à infléchir l'indice des cultures agricoles.

Les chiffres provisoires pour l'intérêt révèlent cependant que le coût de l'intérêt non hypothécaire a augmenté au cours du trimestre, entraînant une hausse du coût global de l'intérêt (+4,4 %). Les agriculteurs ont également payé plus cher les machines agricoles et les véhicules automobiles, dans une large mesure à cause de la majoration du prix des camions et des machines non motorisées comme les cultivateurs et les presses à fourrages.

Nette progression des prix du bétail pour les producteurs de l'Ouest

Les agriculteurs de l'Ouest ont payé leurs bovins d'engraissement nettement plus cher qu'à la même période il y a un an plus tôt. Ils ont payé plus cher toutes les entrées dans l'élevage d'animaux, sauf les porcelets sevrés et les aliments préparés. Les bovins d'engraissement pèsent également plus lourd dans l'Ouest canadien que dans l'Est.

Les salaires agricoles ont augmenté de 3,6 % au cours des 12 derniers mois et les hausses de prix des machines agricoles et des camions ont contribué à une augmentation d'une année à l'autre pour les machines agricoles et les véhicules automobiles.

Les agriculteurs de l'Ouest ont payé plus cher les pesticides (+1,7 %), mais ces hausses ont été épongées par des diminutions de prix pour les pommes de terre de semence et les engrais (-10,7 %). La baisse des coûts des prêts non hypothécaires a contribué à ramener le coût annuel d'intérêt à 5,7 %.

Encore une fois, les producteurs de l'Est ont payé plus cher les bovins d'engraissement mais n'ont pas été touchés aussi fort que leurs homologues de l'Ouest par les hausses ayant touché les autres entrées destinées au bétail d'engraissement.

Alors que les salaires agricoles, les machines agricoles et les véhicules automobiles ont enregistré dans chaque cas une progression de 2,5 %, les agriculteurs de l'Est ont dû payer plus cher les pesticides (+2,0 %) et n'ont eu droit qu'à de légères diminutions du prix des engrais (-0,4 %).

L'Est a également profité de la baisse des coûts d'intérêt, qui ont chuté de 6,2 % à la suite de la diminution des taux des prêts non hypothécaires.

(1) The indexes are subject to a two-stage revision. Quarterly, the indexes are revised for the preceding quarter. Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Les indices font l'objet d'une révision en deux temps. D'abord, l'indice d'un trimestre donné est révisé le trimestre suivant. Ensuite, une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(1) Annual revision takes place in the first quarter and is applicable to the indexes for the past two years.

(1) Une révision annuelle portant sur les deux années précédentes a lieu au premier trimestre.

(2) The average rate for all outstanding loans of the corresponding type.

(2) Le taux moyen pour tous les prêts non remboursés du type correspondant.

TECHNICAL NOTES

FARM INPUT PRICE INDEX (1986=100)

1. Concepts, Data Description and Methods

The Farm Input Price Index (FIPI), 1986=100, measures the price changes of a basket of goods and services purchased by Canadian farmers for use in agricultural production. The basket is made up of the inputs bought by farmers in 1986. The index is calculated by comparing current prices for those inputs to the average of their prices in 1986.

The Farm Input Price Index is useful in transforming current dollar expenditures into constant dollars, which are an important component of analytical studies and econometric modelling. The FIPI and its details are also used to monitor price changes which are considered in the operations of marketing boards and in price stabilisation programmes.

The total FIPI represents the aggregate price change for all inputs into all kinds of farming operations. For a particular application, it may be more appropriate to select specific inputs and calculate a weighted average of them using the particular patterns of cost or expenditure that are more appropriate. Whatever basket is used, one should remember that the basket is fixed over time. For this reason, the index cannot measure changes in production costs due to changes in the mix of inputs used, or changes in productivity. Furthermore, comparisons of indexes between different regions for the same item or group of items only indicate differences in price movements over time, they cannot compare price levels in different parts of the country.

This FIPI series succeeds the previous series, 1981=100, covering the period 1981-1985, also the series 1971=100, covering the period 1971 to 1983, and the series 1961=100, covering the period 1961 to 1977. The earlier FIPI series have been converted to a 1986 time-base so that continuous indexes are available, wherever possible. In many cases this is from 1961. For looking at price movements before 1961, in some cases FIPI indexes follow some of the items found in the Price Index Numbers of Commodities and Services Used by Farmers 1935-1939=100 for the years 1913 to 1971.

Index formula

A general formula for an index made up of several items for the current period ($I_{t/0}$) is:

$$I_{t/0} = \frac{\sum p_t q_o}{\sum p_o q_o} \times 100$$

where p_t is the price of an item in the current period, and p_o , q_o and $p_o q_o$ are the price, quantity and value of expenditure of the item in the base (1986) period. This formula can be transformed to:

NOTES TECHNIQUES

INDICE DES PRIX DES ENTRÉES DANS L'AGRICULTURE (1986=100)

1. Concepts, description des données et méthodes

L'indice des prix des entrées dans l'agriculture (IPEA), établi sur la base de 1986=100, mesure la variation des prix des biens et des services qu'achètent les agriculteurs du Canada pour la production agricole. Le panier se compose des biens et des services achetés par les agriculteurs en 1986. Le calcul de l'indice est fondé sur la comparaison des prix courants de ces biens et services et de leurs prix moyens en 1986.

L'indice des prix des entrées dans l'agriculture permet de transformer les dépenses agricoles exprimées en dollars courants en dollars constants, qui sont un élément important des études analytiques et des modèles économétriques. L'IPEA et les détails qu'il renferme servent en outre à suivre l'évolution de ces prix qui sont utilisés par les offices de commercialisation et dans les programmes de stabilisation des prix.

Globalement, l'IPEA représente la variation d'ensemble des prix pour toutes les entrées dans tous les types de travaux agricoles. Cependant, dans certains cas particuliers, il pourrait être préférable de sélectionner des entrées spécifiques et de calculer une moyenne pondérée en se servant des schémas particuliers des coûts et des dépenses qui sont les plus pertinents. De plus, quel que soit le panier utilisé, il ne faut pas oublier que ce dernier est fixe dans le temps. L'indice ne saurait donc mesurer que les variations des coûts de production, attribuables à des changements de la composition des entrées, et non pas celles de la productivité. En outre, les comparaisons des indices de diverses régions pour un même article ou groupe d'articles ne révèlent que les divergences des mouvements de prix dans le temps et ne peuvent servir à rapprocher les niveaux de prix dans les diverses régions du pays.

Cette série fait suite à l'IPEA précédent établi sur la base de 1981=100 pour la période allant de 1981 à 1985, sur la base 1971=100, pour la période allant de 1971 à 1983, et à l'IPEA établi sur la base de 1961=100 pour la période allant de 1961 à 1977. Les séries antérieures ont été converties sur la base de 1986 afin d'assurer, dans la mesure du possible, l'uniformité des indices. Dans certains cas, la conversion est effectuée à partir de la base de 1961. En ce qui a trait aux mouvements de prix antérieurs à 1961, les indices de l'IPEA suivent quelquefois, certains des articles que l'on trouve dans les nombres-indices des prix des produits et services utilisés par les agriculteurs sur la base de 1935-1939=100, pour les années 1913 à 1971.

Formule de l'indice

La formule générale de l'indice de la période courante, composée de plusieurs articles, ($I_{t/0}$) est la suivante:

où p_t est le prix de l'article au cours de la période courante, p_o , q_o et $p_o q_o$ représentent respectivement le prix, la quantité et la valeur de l'article figurant dans l'indice de la période de base (1986). Cette formule est ensuite convertie comme suit:

$$I_{t/0} = \sum (p_t / p_o)^w$$

where

où

$$w = 100 \times \frac{p_o q_o}{\sum p_o q_o}$$

Expressed this way, the "w" is the percentage weight of an item – its percentage share in the total expenditure in the base period for all items in the index of which it is part.

Exprimé de cette façon, "w" est le poids en pourcentage d'un article – soit sa part en pourcentage des dépenses globales de la période de base pour tous les articles de l'indice dont il fait partie.

Composition of the basket

The definition of what should be included in the basket was last done in 1981. The main source of information for the weights of major groups and groups of items was Farm Operating Expenses and Depreciation Charges for 1986. More detailed weights, applying to the detailed composition of items in each group were estimated in 1981 from various additional sources, such as production statistics for both agriculture and manufacturing, and subsequently revalued to 1986 prices. With the publication of the expanded list of item indexes in 1992, many detailed weights in the expanded areas were re-estimated from the most recent available data on production and use. Tables of percentage weights are Appendixes 1 and 2 in this book.

Composition du panier

C'est en 1981 qu'on a procédé pour la dernière fois à la définition des articles qui composent le panier. Les dépenses d'exploitation agricole et d'amortissement de 1986 constituent la principale source d'information qui permet d'estimer les pondérations pour les groupes principaux et les groupes d'entrées. Les pondérations plus détaillées, qui servent à établir la composition exhaustive des articles de chaque groupe, ont été estimées en 1981 à partir de diverses sources additionnelles, notamment les statistiques sur la production agricole et manufacturière, et réévaluées par la suite en fonction des prix de 1986. La diffusion, en 1992, de la liste élargie d'articles a coïncidé avec la réévaluation de nombreuses pondérations détaillées dans les secteurs élargis à partir des données les plus récentes sur la production et l'utilisation. Les tableaux des pondérations en pourcentage figurent aux annexes 1 et 2 du présent ouvrage.

Sources of price information

Until 1992 the price information was derived from a variety of sources: direct farm suppliers (e.g. for farm machinery and seed); other price indexes such as the Industry Product Price Index (e.g. for fertilizer) and the Consumer Price Index (e.g. for car insurance); information collected by other divisions of Statistics Canada and other federal departments (e.g. for labour, feed, property taxes). In some cases, notably for custom work and farm rents, direct pricing is not available, so these indexes are imputed from other series.

Sources de renseignements sur les prix

Jusqu'en 1992, les renseignements sur les prix provenaient de diverses sources: les fournisseurs des agriculteurs (par exemple, les fournisseurs de machines agricoles et de semences), les autres indices de prix, notamment l'indice des prix des produits industriels (ex. engrais) et l'indice des prix à la consommation (ex. assurance des véhicules) et les renseignements recueillis par d'autres divisions de Statistique Canada et des ministères fédéraux (par exemple, les données relatives à la main d'œuvre, aux aliments pour animaux, aux impôts fonciers). Dans certains cas, notamment celui du travail sur commande et des loyers agricoles, on impute ces indices à partir d'autres séries, le relevé direct des prix n'étant pas effectué.

Since the beginning of 1992, the sources of price information have been improved and extended, through a programme funded by Agriculture Canada. To provide more geographic detail, and to get more relevant prices, direct surveys of farm suppliers have been set up in the following areas: fertilizers, pesticides and fuels; building supplies, small tools and machinery and vehicle parts and repair. In almost all cases this pricing replaces poorer secondary sources. In addition the surveys of farm machinery and seed have been enlarged.

Depuis le début de 1992, on a amélioré et élargi les sources de données sur les prix dans le contexte d'un programme financé par Agriculture Canada. En vue d'accroître le nombre de détails géographiques et la pertinence des prix, on mène maintenant des enquêtes auprès des fournisseurs agricoles dans les domaines suivants: engrais, pesticides et carburants; fournitures de construction, petits outils et machinerie; pièces et réparations de véhicules. Dans presque tous les cas, ces relevés de prix remplacent des sources secondaires de moindre qualité. En outre, on a élargi les enquêtes sur la machinerie agricole et les semences.

Where possible, the prices used in the FIPI are transaction prices which correspond to those effectively paid by farmers, including the effect of all applicable taxes and subsidies. Because of the changes in sources, the FIPI from 1992 onward reflect more closely the movement of actual transaction prices.

Dans la mesure du possible, les prix utilisés dans l'IPEA sont les prix des transactions qui correspondent à ceux effectivement payés par les agriculteurs et tiennent compte notamment de toutes les taxes et subventions applicables. En raison des changements de sources, l'IPEA de 1992 et ceux des années subséquentes sont plus représentatifs du mouvement des prix réels des transactions.

Sample design

The samples of prices collected for the FIPI are designed to provide an index reliable at the level of detail shown in this publication. For this purpose, the samples are stratified to ensure that no important type of price change is omitted from the index. In this process, pricing categories are identified and split into sub-groups as needed to represent the commodity group. Samples are chosen to represent the price movement of each sub-group. As the number of price observations at this fine level of detail is more limited the reliability of the price movement is less than in the higher-level indexes shown here. Nevertheless, in most cases these detailed indexes are available to interested users.

The same design considerations apply geographically. Part of the expansion in 1992 was to put provincial indexes on as sound a base as the Eastern and Western Canada indexes were previously and to allow calculation of provincial FIPI totals. This has been done for each of the provinces from Quebec west. For the Atlantic Provinces as a whole the indexes are based on the same depth of coverage, but the individual provincial indexes in that region are based on thinner samples.

Timeliness and revisions

The indexes are published quarterly, about five weeks after the end of the reference quarter. Notice and summary figures are given in the Statistics Canada Daily Bulletin (Catalogue no. 11-001-XPB) and the data are available on CANSIM on that date. This publication is distributed about three weeks later.

In each quarter, indexes for the preceding quarter are subject to revision. Also, with the publication of the first quarter figure for each year, indexes for the preceding two years are subject to revision. These revisions mainly affect those indexes which are estimated in whole or part on annual data (property taxes, farm rent and interest).

Data availability

All publishable indexes are on CANSIM. Matrices 2050 to 2063 include more than 100 provincial or regional indexes covering more detail than is included in this publication. Matrices 550 to 582 include sub-provincial indexes for some items. A table showing which CANSIM matrices apply to which provinces is in Appendix 3.

Alternatively, users may get the additional detail from Prices Division.

In addition to index numbers the surveys of prices of fertilizers, pesticides and fuels, begun in 1992, provide estimates of average prices in different parts of the country, at different times of the year. These data may serve other needs than those satisfied by the time index series. Interested users should contact Prices Division. The average prices are also on Matrices 550 to 582.

Conception de l'échantillon

Les échantillons de prix relevés pour l'IPEA doivent permettre le calcul d'un indice fiable au niveau d'agrégation de la présente publication. À cette fin, les échantillons sont stratifiés pour faire en sorte qu'aucun type important de variation de prix ne soit omis de l'indice. À ce stade, on détermine les catégories de prix et on les répartit en sous-groupes au besoin pour représenter le groupe de produits. On sélectionne des échantillons pour illustrer les mouvements de prix dans chaque sous-groupe. Les observations de prix à ce niveau d'agrégation étant plus limitées, la fiabilité du mouvement des prix est donc inférieure à celle des indices de haut niveau. Néanmoins, dans la plupart des cas, les utilisateurs intéressés peuvent se procurer ces indices détaillés.

Les mêmes considérations relatives à la conception s'appliquent au niveau géographique. L'élargissement de 1992 consistait notamment à établir les indices provinciaux sur une base aussi solide que ne l'était antérieurement celle des indices de l'Est et de l'Ouest du Canada et à permettre le calcul des totaux provinciaux de l'IPEA. Ce qui a été fait pour chacune des provinces à l'ouest du Québec. Pour ce qui est des indices d'ensemble des provinces de l'Atlantique, la couverture est tout aussi étendue mais les indices provinciaux individuels de cette région sont fondés sur des échantillons moins grands.

Actualité des données et révisions

Les indices sont diffusés sur une base trimestrielle, environ cinq semaines après la fin du trimestre de référence. L'avis et le résumé paraissent dans Le Quotidien de Statistique Canada (n° 11-001-XPB au catalogue) et les données sont versées dans CANSIM le même jour. La présente publication est diffusée environ trois semaines plus tard.

À chaque trimestre, les indices du trimestre précédent font l'objet d'une révision. En outre, la révision des indices des deux années précédentes coïncide avec la diffusion des chiffres du premier trimestre de chaque année. Les révisions s'appliquent surtout aux indices estimés, intégralement ou partiellement, à partir des données annuelles (impôts fonciers, loyer agricole et intérêt).

Disponibilité des données

Tous les indexes qui peuvent être diffusés sont stockés dans CANSIM. Les matrices 2050 à 2063 contiennent plus de 100 indices provinciaux ou régionaux plus détaillés que la présente publication. Les matrices 550 à 582 comprennent les indices infra-provinciaux de certains articles. Vous trouverez à l'annexe 3 un tableau qui indique à quelle province correspondent les matrices de CANSIM.

Comme alternative, les utilisateurs peuvent obtenir des détails additionnels en s'adressant à la Division des prix.

Outre les chiffres des indices, les enquêtes sur les prix des engrais, des pesticides et des carburants, qui ont été mises en œuvre en 1992, fournissent des estimations des prix moyens dans les différentes régions du pays, à diverses époques de l'année. Ces données peuvent répondre à des besoins autres que ceux qui sont comblés par la série des indices chronologiques. Les intéressés doivent communiquer avec la Division des prix. Les prix moyens sont également indiqués dans les matrices 550 à 582.

For further information

For data only, please contact the information unit at (613) 951-9606 or any regional office. For further information on concepts and methods, contact Vaclav Krabicka at (613) 951-3342. The addresses are on the inside front cover of this book.

Renseignements additionnels

Pour obtenir des données, veuillez communiquer avec la Sous-section de l'information et de l'analyse courante (613) 951-3350 ou avec n'importe quel bureau régional. Pour avoir plus de renseignements sur les concepts et les méthodes, vous êtes priés de vous adresser à Vaclav Krabicka au (613) 951-3342. Les adresses figurent dans la couverture avant intérieure de la présente publication.

APPENDIX - 3**Farm Input Price Index –****CANSIM Matrix and Series Numbers**

Average prices and indexes of Selected Farm Inputs are now available on CANSIM by geographic regions as follows:

Matrix number	Geographic Regions	Series Number
n° de matrice	Région géographique	n° de série
550	Newfoundland – Terre-Neuve	607000
551	Prince Edward Island – Île-du-Prince-Édouard	607100
552	Nova Scotia – Nouvelle-Écosse	607200
553	New Brunswick – Nouveau-Brunswick	607300
554	Quebec-East – Québec-Est	607400
555	Quebec-South – Québec-Sud	607500
556	Quebec-West-Central – Québec-Ouest-Centre	607600
557	Quebec-East-Central – Québec-Est-Centre	607700
558	Quebec-West – Québec-Ouest	607800
559	Ontario-South – Ontario-Sud	607900
560	Ontario-North – Ontario-Nord	608000
561	Ontario-Central – Ontario-Centre	608100
562	Ontario-East – Ontario-Est	608200
563	Ontario-West – Ontario-Ouest	608300
564	Manitoba-South-West – Manitoba-Sud-Ouest	608400
565	Manitoba-North-West – Manitoba-Nord-Ouest	608500
566	Manitoba-Central – Manitoba-Centre	608600
567	Manitoba-East – Manitoba-Est	608700
568	Saskatchewan-South-East – Saskatchewan-Sud-Est	608800
569	Saskatchewan-South-West – Saskatchewan-Sud-Ouest	608900
570	Saskatchewan-West-Central – Saskatchewan-Ouest-Centre	609000
571	Saskatchewan-East-Central – Saskatchewan-Est-Centre	609100
572	Saskatchewan-North – Saskatchewan-Nord	609200
573	Alberta-South-East – Alberta-Sud-Est	609300
574	Alberta-South-Central – Alberta-Sud-Centre	609400
575	Alberta-South-West – Alberta-Sud-Ouest	609500
576	Alberta-East-Central – Alberta-Est-Centre	609600
577	Alberta-West-Central – Alberta-Ouest-Centre	609700
578	Alberta-North-East – Alberta-Nord-Est	609800
579	Alberta-North-West – Alberta-Nord-Ouest	609900
580	British Columbia-West – Colombie-Britannique-Ouest	610000
581	British Columbia-East – Colombie-Britannique-Est	610100
582	British Columbia-North – Colombie-Britannique-Nord	610200

New Matrix and Series Numbers for Farm Input Price Index starting second quarter 1992 are available on CANSIM as follows:

Les nouveaux numéros de matrice et de série de l'indice des prix des entrées dans l'agriculture, à partir du deuxième trimestre de 1992, sont stockés dans CANSIM comme suit:

Matrix number	Province	Series number
no de matrice	Province	n° de série
2050	CANADA	640000
2051	EAST CANADA – EST CANADA	640200
2052	ATLANTIC – ATLANTIQUE	640400
2053	NFLD – T.N.	640600
2054	PEI – Î.-P.-É.	640800
2055	NS – N.-É.	641000
2056	NB – N.-B.	641200
2057	QUEBEC – QUÉBEC	641400
2058	ONTARIO	641600
2059	WEST CANADA – OUEST DU CANADA	641800
2060	MANITOBA	642000
2061	SASKATCHEWAN	642200
2062	ALBERTA	642400
2063	BC – C.-B.	642600

Agriculture Statistics at work for you

Did you know that Statistics Canada's **Agriculture Division** provides many of its clients with **special services** tailor-made to meet their unique data requirements? Agriculture Division has a variety of information sources at its fingertips that can be used to provide you with **the data you need to make important decisions as an agri-business specialist**.

SPECIAL TABULATIONS

Looking for specific agriculture data to help in your day-to-day work? Agriculture Division can provide you with customized tables and reports that give you the data you require. You can pick and choose the variables from one or more of our databases and receive them in a format that **best suits your needs**.

ANALYTICAL STUDIES

Require in-depth analysis of the data that affect your industry or market? Agriculture Division's specialized team of professionals has the hands-on experience in data analysis **you want working for you**.

CUSTOM SURVEYS

Do you need information that no one has but you don't know how to get it? Agriculture Division can conduct a special survey or expand on an existing one **just for you**.

Find out for yourself what many agriculture professionals have known for years — Statistics Canada has the know-how and expertise to get the job done!

Les statistiques agricoles à votre service

Saviez-vous que la **Division de l'agriculture** de Statistique Canada fournit à un grand nombre de ses clients des **services spéciaux** qui sont adaptés à leurs besoins en matière de données? La Division puise à même une vaste gamme de renseignements pour vous fournir **les données qu'il vous faut pour prendre des décisions importantes en tant que spécialiste de l'agroalimentaire**.

TOTALISATIONS SPÉCIALES

Vous cherchez des données précises sur l'agriculture pour vous aider dans votre travail quotidien? La Division de l'agriculture peut vous fournir des tableaux et des rapports personnalisés qui renferment les données requises. Vous pouvez choisir les variables qui vous intéressent à partir de l'une ou plusieurs de nos bases de données et recevoir les totalisations sous la forme **qui répond le mieux à vos besoins**.

ÉTUDES ANALYTIQUES

Vous voulez une analyse approfondie des données qui touchent votre industrie ou votre marché? L'équipe de spécialistes de la Division de l'agriculture possède l'expérience pratique de l'analyse des données **dont vous avez besoin**.

ENQUÊTES PERSONNALISÉES

Vous voulez des renseignements inédits mais vous ne savez pas comment les obtenir? La Division de l'agriculture peut mener une enquête spéciale ou élargir la portée d'une enquête existante, **uniquement pour vous**.

Ne ratez pas l'occasion de découvrir ce que bien des professionnels du domaine de l'agriculture savent depuis des années - Statistique Canada

Agricultural Statistics on CD-ROM

Whether you are interested in detailed statistics on dairy farming in Ontario, off-farm income in Saskatchewan, or poultry production in Quebec, the data are all there in one easy-to-use package on the **ESAS** CD-ROM. **ESAS**, the Extraction System of Agricultural Statistics, combines software with data on a compact disc to give clients desktop access to a wide array of farm financial and physical statistics.

Whether you need the information by region, farm type or revenue class, **ESAS** has:

- ▶ a complete itemization of operating revenues and expenses;
- ▶ sources and levels of off-farm income for operators and farm families;
- ▶ assets, liabilities, and capital investment for farms; and
- ▶ land use and livestock inventories.

The job of administering and evaluating agricultural programs is a challenging one. **ESAS** simplifies the research burden of program analysts and government administrators with important data on the financial and physical status of Canadian farms. Trade in your stacks of computer printouts for one easy-to-use CD-ROM.

The **ESAS** CD-ROM (catalogue no. 21F0001XCB) is \$625 (plus GST/HST and applicable PST) in Canada and US \$625 outside Canada. Annual Updates are available after the initial purchase for only \$295 (plus GST/HST and applicable PST) in Canada and US \$295 outside Canada. A discount is available to all educational institutions.

To learn more about ESAS, call the Agriculture Division of Statistics Canada toll-free at 1-800-465-1991

To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Reference Centre listed in this publication.

If more convenient, fax your order to **1-800-889-9734** or call toll-free **1-800-267-6677** and use your Visa or MasterCard.

Via Internet: order@statcan.ca

ESAS is the product of a joint venture between Statistics Canada and Agriculture and Agri-Food Canada.

Statistiques agricoles sur CD-ROM

Que votre domaine d'intérêt soit l'élevage laitier en Ontario, les revenus hors ferme en Saskatchewan ou la production de volaille au Québec, toutes les données sont disponibles dans la trousse du CD-ROM **SESA**. Le **SESA**, le système d'extraction des statistiques agricoles, combine logiciel avec données sur un disque compact pour donner aux clients l'accès à un large éventail de statistiques agricoles financières et physiques.

Que vous ayez besoin d'information par région, par type d'exploitation agricole ou par catégorie de revenus, le **SESA** comprend :

- ▶ le bilan complet des revenus et des dépenses d'exploitation;
- ▶ les sources et le niveau des revenus hors ferme des exploitants agricoles et des familles agricoles;
- ▶ l'actif, le passif et les immobilisations;
- ▶ les estimations portant sur l'utilisation des terres et les stocks de bétail.

La gestion et l'évaluation des programmes agricoles présentent un défi. Le **SESA** simplifiera le travail de recherche des analystes des programmes et des gestionnaires des gouvernements en leur fournissant d'importantes données sur la situation financière et matérielle des exploitations agricoles canadiennes. Échangez vos piles d'imprimés d'ordinateur contre un CD-ROM facile à utiliser.

Le CD-ROM du **SESA** (n° 21F0001XCB au catalogue) coûte 625 \$ (TPS/TVH en sus et TVP s'il y a lieu) au Canada et 625 \$ US à l'extérieur du Canada. Les mises à jour annuelles coûtent seulement 295 \$ (TPS/TVH en sus et TVP s'il y a lieu) au Canada et 295 \$ US à l'extérieur du Canada une fois que vous avez acheté la trousse initiale. Tous les établissements d'enseignement peuvent profiter d'un rabais.

Pour en savoir plus sur le SESA, téléphonez sans frais à la Division de l'agriculture de Statistique Canada au 1-800-465-1991

Pour commander, écrivez à Statistique Canada, Division des opérations et de l'intégration, Gestion de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre de consultation de Statistique Canada le plus près indiqué dans la présente publication.

Vous pouvez aussi envoyer votre commande par télécopieur au **1-800-889-9734** ou téléphoner sans frais au **1-800-267-6677** et donner votre numéro de carte VISA ou MasterCard.

Par l'entremise d'Internet : order@statcan.ca

Le SESA est le fruit d'une collaboration entre Statistique Canada et Agriculture et Agroalimentaire Canada.
